

1. Social Media Channel Strategy

Since 4 out of 5 employees are now involved in tech-buying decisions, your marketing must appeal not just to CEOs, but to the "anonymous buyers" (accountants, HR leads, and warehouse managers) who look for tools to make their daily work easier.

- **LinkedIn (The Trust Builder):**
 - **Strategy:** Position yourself as a thought leader in the Ethiopian business ecosystem.
 - **Post Type:** Share "Case Study" graphics. Show a "Before vs. After" of a business using manual spreadsheets versus your Financial Management module.
 - **Engagement:** Use LinkedIn Live for virtual events or "Feature Spotlights" where you show how to generate an Ethiopian tax report in one click.
- **TikTok (The Humanizer):**
 - **Strategy:** Use "Authentic & Unscripted" content. Show the behind-the-scenes of your small team building the software.
 - **Post Type:** "Quick Tips" (e.g., "3 ways to spot inventory leaks in 60 seconds") or "Day in the Life" videos of your developer working on a new customization.
 - **Engagement:** Use the TikTok Q&A feature to answer common Ethiopian business questions regarding taxation or salary regulations.
- **Instagram (The Visual Catalog):**
 - **Strategy:** High-quality graphics detailing your packages and "Aha! moments" within the software.
 - **Post Type:** Carousel posts detailing your different bundles (see below).

2. Tailored Product Bundles

Instead of selling a monolithic ERP, market specific "Problem-Solver" bundles that businesses can understand instantly.

- **The "Digital Core" Bundle (Based on your 1st Client):**
 - **Target:** Service-based businesses or Consultancies.
 - **Includes:** Financial Management + Customer Management + Website Integration.
 - **Value Hook:** "Sync your online leads directly to your bank book. No more manual data entry."
- **The "Retail Growth" Bundle:**
 - **Target:** Local shops and e-commerce startups.
 - **Includes:** Inventory Management + Customer Management + Website Integration.
 - **Value Hook:** "Sell online and in-store with one shared inventory. Never sell an out-of-stock item again."
- **The "Employer Excellence" Bundle:**
 - **Target:** Growing firms with 10+ employees.
 - **Includes:** HR Management + Salary & Taxation + Financial Management.
 - **Value Hook:** "Automate payroll and stay 100% compliant with local tax laws. Close your monthly books in half the time."

3. Visual Graphic Requirements for Social Media

Your Creative Director should design a set of "Package Deal" cards for Instagram and LinkedIn with the following elements:

- **Clean Data Visuals:** Don't just show a list of features. Show a beautiful, easy-to-read dashboard graphic that looks like your software.
- **Transparent Pricing:** Clearly list the 50,000 ETB – 100,000 ETB range for the license.
- **The "6-Month Starter" vs. "3-Year Partner" Plans:** Use a comparison table layout to show the long-term savings of the 3-year deal.
- **Floating CTA:** Every graphic should have a clear "Book Your Free Demo" button or link.

4. High-Conversion "Free Demo" Structure (20-30 Minutes)

To maximize the 10% sales commission for your partners, give them a structured demo script that focuses on *value*, not *buttons*.

1. **The Narrative Arc (5 Mins):** Start with a common local problem (e.g., "Spent all weekend on manual payroll?"). Introduce your ERP as the hero.
2. **The "Aha! Moments" (15 Mins):**
 - **Scenario 1:** Show how a website sale instantly updates the Inventory and the Financial Ledger.
 - **Scenario 2:** Show how the HR module automatically calculates the monthly tax for an employee.
3. **Realistic Data:** Use data that reflects an Ethiopian business (e.g., local currency, local product names) so the client can visualize themselves using it.
4. **Interactive Q&A:** Encourage the owner to ask, "Can it do X for my specific shop?" This builds trust.
5. **The Clear Next Step:** End with a "Trial Period" offer or a "Proof of Concept" plan to close the deal.

5. Growth Strategy: Beyond the Sale

To ensure they "use your ERP throughout its lifetime," offer a **"Quarterly Growth Review."** Every 3 months, check their data (with permission) to suggest how they can use the HR or Inventory modules better to save money. This shifts your role from a software vendor to a business partner.
